APOLLO ADVANCED DIAGNOSTICS & METABOLIC LABS

Accredited by NABL & CAP | Comprehensive Clinical Chemistry Profile

Patient Name: Rajesh Sharma
Age / Gender: 56 Yrs / Male
Referred By: Dr. A. K. Verma, MD (Cardiology)

Patient ID: AP-8947291
Sample Collected: 14-Oct-2026 08:30 AM
Report Generated: 14-Oct-2026 11:15 AM

CLINICAL BIOCHEMISTRY & CARDIO-METABOLIC PANEL

TEST INVESTIGATION	OBSERVED VALUE	UNIT	BIOLOGICAL REFERENCE RANGE
Fasting Blood Glucose (FBS)	**195.0**	**mg/dL**	**70 - 99 (High Alert)**
Resting Blood Pressure (Systolic)	**158**	**mmHg**	**90 - 120 (Hypertensive)**
Serum Total Cholesterol	**272.0**	**mg/dL**	**< 200 (Elevated Plaque Risk)**
Resting ECG ST Depression (Oldpeak)	**2.4**	**mm**	**0.0 - 1.0 (Ischemia Alert)**
Serum Creatinine	**1.85**	**mg/dL**	**0.60 - 1.20 (Renal Load Alert)**
Blood Urea Nitrogen (BUN)	**54.0**	**mg/dL**	**15 - 40 (Elevated)**
Total Bilirubin	**2.6**	**mg/dL**	**0.2 - 1.2 (Jaundice/Liver Alert)**
SGPT / ALT (Liver Enzyme)	**82.0**	**U/L**	**7 - 45 (Hepatocellular Strain)**
SGOT / AST (Liver Enzyme)	**74.0**	**U/L**	**8 - 40 (Elevated)**
Serum Albumin	3.1	g/dL	3.5 - 5.0 (Borderline Low)
Hemoglobin (Hb)	10.8	g/dL	13.0 - 17.0 (Mild Anemia)
Maximum Heart Rate Achieved (Thalach)	132	bpm	120 - 175 (Sub-optimal)

CRITICAL CLINICAL ALERT NOTICE:
Fasting Glucose (195 mg/dL) and Total Bilirubin (2.6 mg/dL) demonstrate significant acute elevation.
ST Depression of 2.4 mm indicates exercise-induced sub-endocardial ischemia. Immediate clinical correlation advised.

Dr. S. Mukherjee, MD (Biochemistry)
Senior Clinical Biochemist

Dr. P. Nair, MBBS, DCP
Chief Pathologist & Lab Director
